

KSCI Repertoire and note to the Singers and Artistic Team

I'm including some context and insight into my choices for music study for those who may be interested. This set aims to tell a story of human connection—of the deep need to be known and to belong. Each piece shines a light on a different kind of need: a plea for mercy, a search for beauty, a celebration of love and culture, and a desire to rise beyond what holds us back. Our repertoire moves through music that resonates as ancient and spiritual, joyful and communal, introspective and bold. Some pieces invite us into mystery and wonder; others ground us in support and strength. At its core, this music addresses what it means to be human—and how singing can hold all of it. Thank you for bringing your voice, your heart, and your story to this experience. I look forward to exploring the story together!
